PROFILE

Frontend engineer with three and a half years of experience at AppsCode, building responsive, scalable web applications in VueJS and Nuxt, including the web console that operations teams use to manage Kubernetes clusters. Skilled in building reusable UI components, translating designs into high-quality code, integrating RESTful APIs, and troubleshooting issues to their root cause before delivering verified fixes. A background in competitive programming brings a thorough approach to problem-solving that looks beyond the first plausible explanation.

EXPERIENCE

Software Engineer, AppsCode Ltd. *Mar 2023 – Present*

- Maintained reusable VueJS components that manage Kubernetes clusters, databases, billing and user platform to ease operations.
- Built complex forms to create and operate 20+ different databases, and maintained them as database features changed.
- Understand customer requirements and fix complex bugs while on call.
- Optimized frontend performance and reduced build sizes across several repositories.
- Collaborate with backend and UI engineers to keep the user experience consistent.
- Review code to maintain a clean, understandable codebase.

SELECTED WORK

Form-Builder — *AppsCode*
Generates complex configuration forms from JSON and YAML input — the schema layer behind product setup flows, and JavaScript functions that keeps track of the rendering conditions of the forms.

Platform-UI — *AppsCode*
Server-side-rendered (SSR) user-management site in Nuxt covering accounts, access, and organisation structure across the platform.

HackerNews — *Personal*
Vue client for the HackerNews API with different tiers of tech news, paginated stories, comment threads and user pages.

SKILLS

- Reusable UI components & front-end libraries
- Responsive, cross-browser UI
- Troubleshooting & debugging
- RESTful API integration
- Performance & build-size optimization
- Fluent written & spoken English

Languages & Tools: VueJS, Nuxt, JavaScript, TypeScript, HTML5, CSS3, React, NextJS, Git, Docker, Postman, C, C++

COMPETITIVE PROGRAMMING

Codeforces · SamiulSourav
Max 1577 · 1200+ solved · 200+ contests

- ACM ICPC Dhaka Regional 2018 — #235
- ACM ICPC Dhaka Regional 2019 — #79
- Rangpur Math Olympiad 2012 — 2nd runner-up

LeetCode · SamiulSourav
500+ problems solved

- BRUR CSE Fest 2017 — #4
- MIST IUPC 2019 — #65
- VU CSE Tech Fest 2019 — #30

UVa · Samiul Sourav
140+ problems solved

- NSU Cybernauts NPC 2018 — #53
- SUST IUPC 2019 — #93
- MIST NCPC 2020 — #100

EDUCATION

B.Sc. in Computer Science & Engineering *2016 – 2022*
Begum Rokeya University, Rangpur · CGPA 3.27
